

Charting Our Course to a More Sustainable Future

What's New:

- On track to meet our existing targets for GHG and freshwater intensity
- Completed initial assessment of our scope 3
 GHG emissions
- Completed initial Life Cycle Assessments (LCAs) of our lithium products
- Established new targets for our DE&I priorities

Sustainability is core to our longterm strategy. Our Sustainability Report highlights progress, commitments, and successes we realized in 2021 on a global scale as we continue to add value for all our stakeholders through our sustainability efforts.

People, Workplace & Community

We are committed to building an inclusive and diverse workplace. We promote collaboration and engage in the communities where we work and live.

Sustainable Shareholder Value

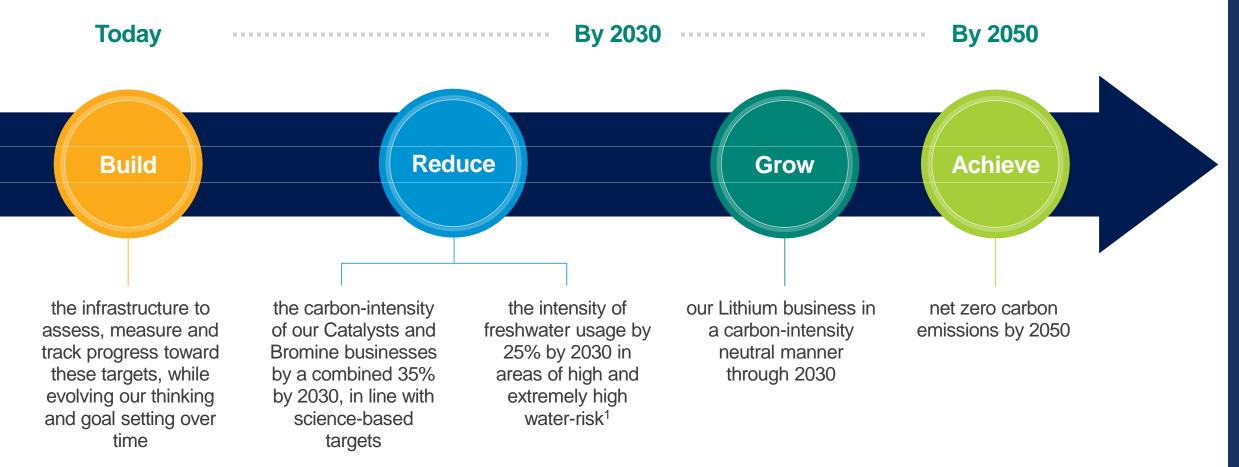

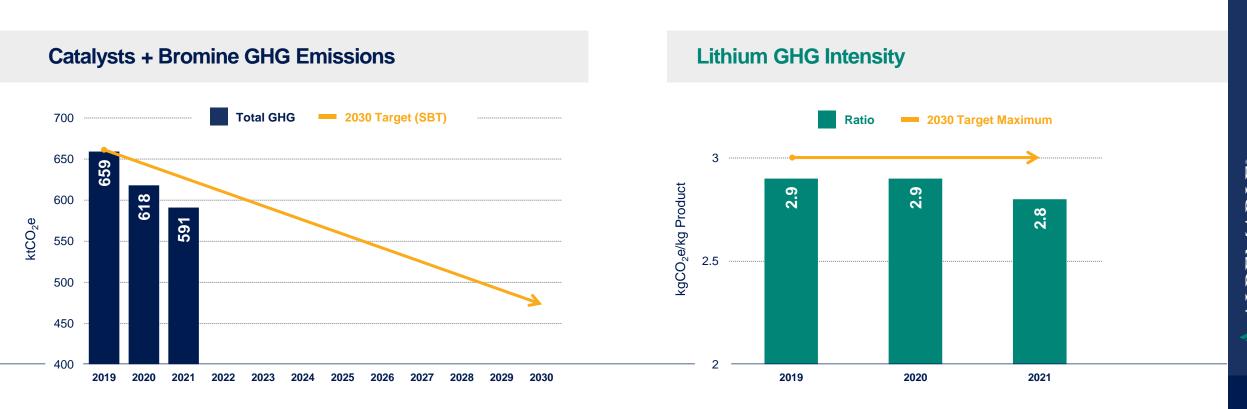

We foster the conditions that create sustainable, long-term value for our shareholders and stakeholders.

Our Environmental Targets

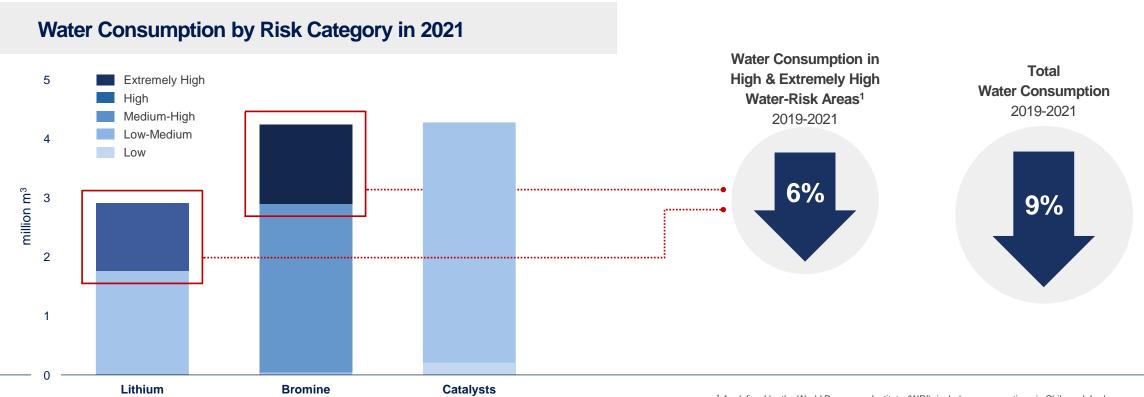

Progress Towards Our Targets: Greenhouse Gas Emissions

- 2021 GHG emissions for Catalysts and Bromine decreased primarily due to reduced Catalysts' production, procurement of green electricity, and energy efficiency projects like better heat integration
- 2021 GHG intensity for Lithium beat target, primarily due to greener electricity mix via renewable contracts, power purchase agreements (PPAs) and investments in local solar energy installations
- Continuing to expand renewable energy use, improve the energy efficiency of new plants and seek incremental energy efficiencies for existing plants

Progress Towards Our Targets: Freshwater Intensity

- 2021 total freshwater consumption declined primarily due to reduced production in Catalysts
- 2021 freshwater consumption in areas of high and extremely high-water risk declined primarily due to efficiency improvements and investments in novel technologies in Jordan
- In our 2022 report, we expect continued declines as we bring on our new thermal evaporator in Chile (completed late 2021) and continued efficiency projects in Jordan
