HANDLING & STORAGE

Handling Highly flammable solid. Dust explosion hazard.

A pure titanium powder with high Ti metal content. Ti metal powder is resistant to most chemical reagents but is attacked at elevated temperatures by acids and oxidizing agents. Dilute aqueous hydrofluoric acid attacks titanium vigorously.

Keep away from flames, sparks and heat sources. Use ground connected metallic apparatus to prevent electrostatic charges causing self ignition. Vacuum drying of suspensions is not recommended. Wear gloves and protective goggles. Titanium powder is a flammable solid and should be handled with caution. Mixing, blending, milling, and grinding of dry Ti powder should be done only under argon or helium. In case of fire, cover with dry sand or dry chemical/dolomite (powdered limestone). Never extinguish with water, carbon dioxide, or halocarbon.

See our safety data sheet and special precautionary advice for more information on safety.
